01 About Devnet

Two decades of building software.

At Devnet we've spent **20+ years** engineering web and mobile products — from first concept to live, scaled apps. The platforms in this portfolio, we designed, built, and shipped end-to-end. No outsourcing, no hand-offs: one team that cares how the thing actually feels.

A UK software studio based in London, working with founders and teams who care how their product feels. We build quietly and rigorously — short, transparent iterations, real progress early, and software that holds up once real users arrive.

Consumer

From first concept to live, scaled apps — **we designed, built, and shipped every platform in this portfolio end-to-end.**

02 What We Do

Eight disciplines, one team.

Innovative engineering, design, and delivery — everything your product needs under one roof.

01 Web Development

Modern, responsive, secure websites built for speed and accessibility.

02 Mobile App Development

High-quality iOS & Android apps with smooth, scalable performance.

03 Bespoke Software

Custom software designed around your workflows and industry.

04 Full-Stack Development

End-to-end delivery across frontend, backend, databases & APIs.

Built with a modern stack — **React, Next.js & React Native** — chosen to keep your product fast, secure, and ready to scale.

05 QA & Testing

Rigorous quality assurance so releases ship stable and predictable.

06 Maintenance & Support

Monitoring, updates, and care that keep products healthy as they grow.

07 UI/UX Design

User flows, wireframes, and interfaces designed around how it feels.

08 Cloud & DevOps

Reliable deployment, infrastructure, and automation pipelines.

One team, end to end — **design, engineering, and delivery under one roof**, from first idea to launch and beyond.

03 How We Work

Your roadmap from idea to reliable software.

A clear, proven process that takes your product from idea to launch — transparent at every step, so you see progress early and often.

The Devnet process

01 · Consultation

We clarify scope, priorities, and success metrics — and give you a realistic estimate and a clear next step.

02 · Design

Idea into user flows, wireframes, and UI aligned with your brand — with key technical decisions made early.

03 · Development & Delivery

Frontend, backend, mobile, and AI built in short, transparent iterations — adjusted on real feedback.

04 · Launch, Support & Optimization

Deployment, monitoring, and post-launch support — refining features and extending the roadmap on real data.

Transparent

See progress early and often, every iteration.

In-house

One team — no outsourcing, no hand-offs.

Built to last

Software that holds up once real users arrive.

04 Selected Work

Software that solves real problems.

Nine products spanning field ops, martech, greentech, restaurant tech, security and more – designed and built in-house.

DineAByte FEATURED

RESTAURANT TECH · COMING SOON

The smarter way to run your restaurant – AI-powered ordering, dynamic menus, real-time kitchen analytics, and guest intelligence in one platform.

[AI Menu Engine](#) [Kitchen Analytics](#) [Guest Intelligence](#)

Optaxia

FIELD OPERATIONS

Geo-verified photo capture, stored securely in the cloud.

Aythn

MARTECH

AI that captures and qualifies Facebook leads in real time.

PasLogic

GREENTECH

Operations software for ECO & Green Deal installers.

RouteKnots

MOBILITY

Optimized multi-stop routes, from point A to point B.

MLR360

HEALTH × LEGAL

Court-ready medico-legal reports, automated.

PassKnots

SECURITY

A zero-knowledge password vault, encrypted with your key.

RetroKnots

CONSTRUCTION

Retrofit management, from planning to execution.

Gripoints

CONSUMER

Task-based rewards that guide kids through positive reinforcement.

05 Case Studies

Three products, start to finish.

A closer look at products we designed, built, and shipped end-to-end.

RESTAURANT TECH · COMING SOON **FEATURED**

DineAByte

The challenge
Restaurants juggle ordering, menus, kitchen flow, and guest experience across disconnected tools.

What we built
Next-generation restaurant tech — AI-powered ordering, dynamic menus, real-time kitchen analytics, and guest intelligence in one platform.

[AI Menu Engine](#) [Kitchen Analytics](#) [Guest Intelligence](#)

GREENTECH · LIVE

PasLogic

The challenge
ECO and Green Deal work carries heavy compliance overhead and operational complexity for installers.

What we built
Operations software that bakes industry regulation and governing-body principles directly into the workflow — lifting efficiency and performance end-to-end.

[Web](#) [GreenTech](#) [ECO Schemes](#) [Compliance](#)

SECURITY · LIVE

PassKnots

The challenge
Teams need to store and share credentials without handing trust to a central party.

What we built
A zero-knowledge vault where every entry is encrypted under the user's own master key — with secure, email-based sharing and invites.

[Web](#) [Security](#) [Zero-Knowledge](#) [Productivity](#)

Let's build something.

Have an idea worth building? We'll turn it into a realistic plan – complimentary 30-minute intro call, no deck required.
